The story follows John and Ellen, a couple who have been married for over 50 years. John is a retired professor and Ellen is a former nurse. They have two grown children and four grandchildren. John and Ellen have always been close, but their relationship is tested when John is diagnosed with Alzheimer's disease.

At first, John's symptoms are mild. He forgets things here and there, and he has trouble finding the right words sometimes. But as the disease progresses, John's symptoms become more severe. He starts to lose his memory, and he becomes confused and disoriented. He can no longer do the things he used to love, like playing the piano or going for walks.

Ellen is heartbroken to see her husband slipping away. She knows that there is no cure for Alzheimer's disease, but she is determined to make the most of their time together. She takes care of John with love and patience, and she never gives up hope.

Stardust is a story about the challenges of Alzheimer's disease, but it is also a story about love, loss, and the power of the human spirit. It is a story that will stay with you long after you finish reading it.
