

# The Diabetic Charcot Foot And Ankle: A Comprehensive Guide for Diagnosis, Treatment, and Prevention

The diabetic foot and ankle are a major source of morbidity and mortality in patients with diabetes. Diabetic foot ulcers are a common complication of diabetes, and they can lead to amputation if not treated promptly and appropriately. Charcot foot is a rare but serious complication of diabetes that can lead to severe deformity and disability.

## The Diabetic Charcot Foot and Ankle: A Multidisciplinary Team Approach, An Issue of Clinics in Podiatric Medicine and Surgery (The Clinics: Orthopedics Book 34) by Grant Goddard
