# Principles of Design

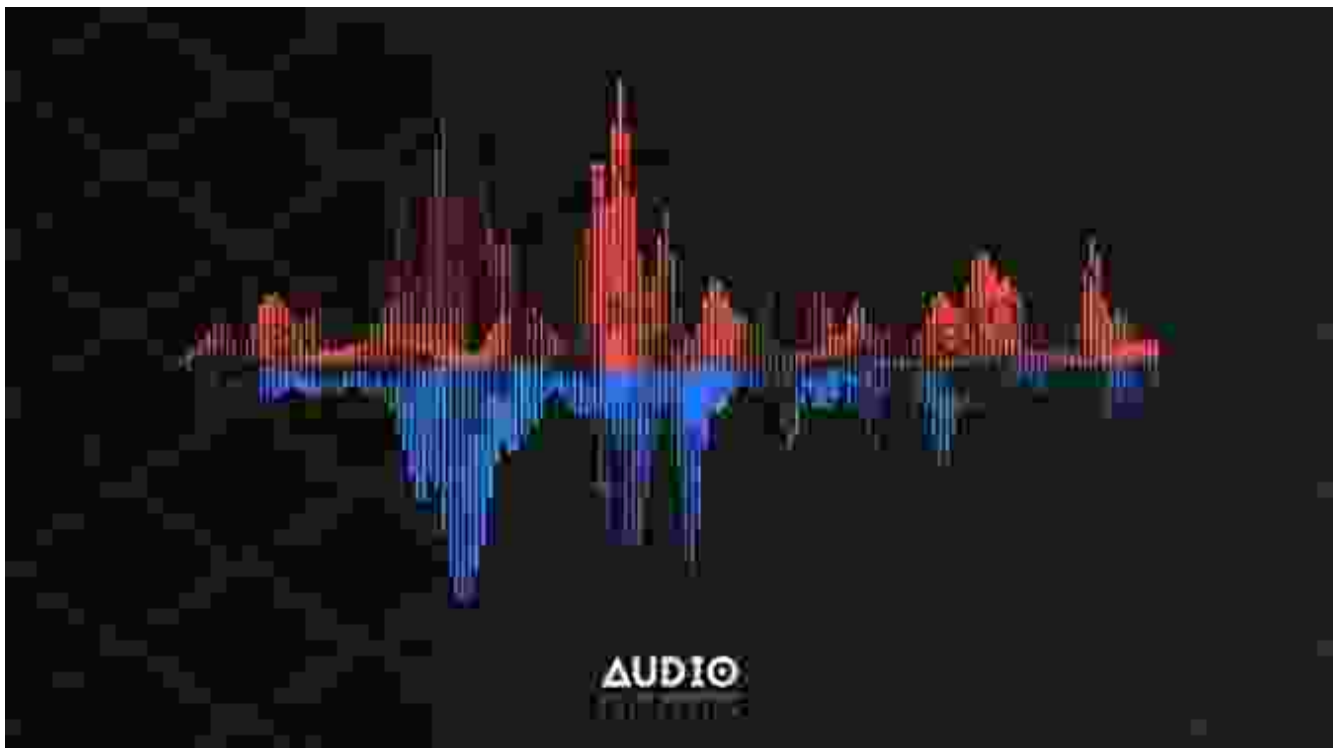

These are the standards or rules to be observed by Artists in creating works of Art; they are how to create and organize Artwork. When elements are utilized with the principles in mind, outstanding Artwork is created.

	<b>Balance</b> A distribution of visual weight on either side of the vertical axis. Symmetrical balance uses the same characteristics. Asymmetrical uses different but equally weighted features.
	<b>Contrast</b> The arrangement of opposite elements (light vs. dark, rough vs. smooth, small vs large, etc...) in a composition so as to create visual interest.
	<b>Emphasis</b> Used to make certain parts of an Artwork stand out. It creates the center of interest or focal point. It is the place in which an Artist draws your eye to first.
	<b>Movement</b> How the eye moves through the composition; leading the attention of the viewer from one aspect of the work to another. Can create the illusion of action.
	<b>Pattern</b> The repetition of specific visual elements such as a unit of shape or form. A method used to organize surfaces in a consistent regular manner.
	<b>Rhythm</b> Regular repetition of, or alternation in elements to create cohesiveness and interest.
	<b>Unity</b> Visually pleasing agreement among the elements in a design; It is the feeling that everything in the work of Art works together and looks like it fits.

## Exploring the Power of Sound Aesthetics
